

Tracker for Unpowered Assets Connect 150

Product Information Sheet

The C150 is a waterproof GNSS (Global Navigation Satellite System) tracker that is designed for fixed asset tracking applications. It is powered by an internal battery pack allowing more than 1800 days standby time. It supports a flexible switch between continuous mode (real time monitoring) and power save mode which periodically confirms asset status.

- Waterproof, IPX7 compliant
- Low power consumption, long standby time for more than 1800 days
- Internal u-blox chipset
- Quad band GSM/GPRS 850/900/1800/1900 MHz
- Embedded @Track protocol
- Internal GSM antenna
- Internal GPS antenna

Specifications

Connectivity

GPS location technology
2G communications

Weight

140g

Dimensions

LxWxH
118mm x 69.5mm x 26.8mm

Enclosure

Fire-resistant PVC black casing

Certification

CE/FCC
